About me

- I'm the most common large wild bird in the UK
- I like hanging around with my friends – flocks of us sometimes reach the thousands!
- My wings clatter loudly when I fly away!
- I have lots of nicknames such as the woody, cushat, cushy-do and ring dove

What I eat

- Crops such as cabbages, sprouts, peas and grain
- I also like shoots, buds, berries, seeds and nuts
- Oilseed rape is a favourite winter food

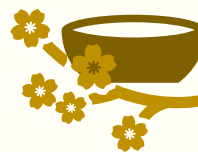

My feather colours

- I'm largely grey with a white neck ring, pinky chest and white wing patches

Where I live

- I thrive in the countryside but am equally at home in urban areas

My nest

- Simple platform of twigs, which is typically built in a tree or high up in a building
